The Best New Kitchen Ideas for 2010

If you are thinking about remodeling your kitchen this year, consider these innovative kitchen trends you didn't know you wanted until now!

Drawers That Pull Out All the Stops

Homeowners are finding that drawers in the kitchen make a lot of sense. Consider these options if you are replacing your cabinets or appliances:

- Instead of storing pots and pans in a standard cabinet, homeowners are turning to deep storage drawers next to their cooking ranges to hold their pots and pans. Drawers lend a nice, streamlined look to your kitchen.
- Warming drawers make it easy for you to entertain like a caterer. They can help keep your main dish warm while you are serving the first course.
- Dishwasher drawers are the latest way to clean your dishes. You can use one as your main dishwasher, or opt for one in your butler's pantry or basement game room.

Camouflage for Your Kitchen

Keep unsightly recycling and trash out of sight with a dedicated trash/recycling area under your sink, in a pull-out drawer, or in the pantry. Appliance garages give you easy access to appliances such as mixers, toasters or bread machines but help keep your counters from looking cluttered.

Double Up on the Convenience

Anyone who has entertained knows how helpful an additional oven can be. Homeowners who opt for a double oven get the convenience of having a main oven for everyday use and a secondary oven for plate warming and additional baking. It also gives you new kitchen floor plan possibilities now that you can move your cooktop to your island or in another spot.

Storage That Makes Sense

Homeowners now have dozens of choices when it comes to storage that makes the most of space. So whether they choose vertical cabinet dividers to easily store cookie sheets, servers and other large, flat items, or go for the corner cabinet with the lazy susan, homeowners will finally be able to feel organized.

Cabinetry with glass inserts not only enables you

to keep everything in its place, it gives you a way to showcase your special pieces.

No More Heavy Lifting

Eliminate having to lug water from your sink to your stove by installing a pot filler in your kitchen wall. Your back will thank you!

So make 2010 the year your kitchen becomes perfect for you and your everyday lifestyle. Call T&K at (732)625-9885 or go to our [website](#). We can help you design and build a kitchen you'll love to use.

Home Maintenance Tip: Education and Safety Go Hand in Hand

Take some time this month and familiarize or re-familiarize responsible family members with the location of your home's gas main valve, water main valve, and fuse box. Make sure charged flashlights can be found easily should the power go out unexpectedly.

See you next month!
